UNIT 217

UNSEEN HEROES

Duvdevan is the IDF's undercover counterterrorism unit. Its operators work in silence, and most people will never know what they have sacrificed. On October 7 they fought in the communities under attack, including Kfar Aza, and they have served on multiple fronts ever since.

HOW WE WORK

BUILT AROUND THE TEAM

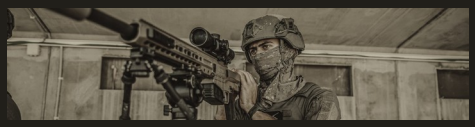

01 **Undercover is different.** What these operators carry home is different, and so is the care they need.

02 **They won't ask.** The silence that protects the mission can also keep them from reaching out.

03 **Care through the team.** Our therapists talk directly with the fighters, and everything happens in the team.
